TERMINAL YARDS AT RIETH VISITED BY RAILROAD OFFICERS

SUPERINTENDENT BOLLONS AND OTHER OFFICIALS INSPECT ON TUESDAY.

Pendleton Lumber Company Negotiating for Lease on Ground and May Put Up a Branch Yard; Steam Wrecker Outfit Is Transferred From Umatilla; Other News.

(East Oregonian Special.) RIETH, Ore., May 13.—Superintendent Bollons and other officials visited us Tuesday for an inspection of the terminal yards and shops, going on west on No. 17 at noon.

Mr. and Mrs. R. A. Rudd, Mr. and Mrs. Frank Martin and Mrs. F. N. Luse were passengers to Pendleton Monday morning.

Mrs. R. D. Bunnell and son returned home Thursday evening from a 2-weeks' visit at Loon Lake, Wash.

Assistant Engineer Williams of La Grande with two assistants was here Thursday taking various measurements of tracks and buildings for permanent record.

Yardmaster McKee has completed arrangements for a lease of ground just east of the Crawford boarding house and will immediately commence the erection of a neat 4-room bungalow. R. D. Bunnell is drawing up the plans for it.

Operator J. A. Baird, formerly operator here but now located at Duncan, came in Wednesday to spend the day. Mr. Baird is very much pleased with his new location up Meacham creek as he is quite a fisherman.

Foreman G. M. Ring of the bridge gang, has just finished the erection of a standard train order semaphore at the depot which enables the people to distinguish the depot from the residences, although that is not the real purpose of these semaphores.

Clifford D. McNurien, night mail-carrier, laid off a couple of days this week and went to Umatilla to visit with home folks.

Eugene A. Blair, who has been doing relief work as car clerk the past 10 days, left Friday morning.

The Umatilla steam wrecker outfit has been transferred to this point and is now located at the round-house ready for any emergency that may arise.

We are reliably informed that one of the leading lumber yards at Pendleton are negotiating for a lease on the railroad ground and will put in a branch yard here as soon as the papers are made out. This class of business will do well here from the start as there will be all kinds of building operations under way within a short time.

ITALIAN STUDENTS GO TO COLLEGE BETWEEN BATTLES

(By United Press.)

UDINE, Italy, May 13.—American university students who complete their academic courses by delivering papers, waiting table, etc., are gone one better by the medical students of the Italian universities at the front here today.

Although mobilized and actually fighting at the front, the medical students of the fifth and sixth years have been installed at general headquarters here a medical school where they complete their studies between battles and graduate on schedule time. The school is called Castrone university.

This novel undertaking is possible because in all Italian schools and universities the curriculum is uniform. The government sent the material and professors. The building is equipped with lecture rooms, clinics, operating rooms, laboratories, hospital and every detail of the modern medical school.

The students prepare their lessons in the trenches or wherever they happen to be and attend lectures and clinics as often as their military du-

Villa Would Be American. DEMING, N. M., May 13.—Little Jesus Paet is at the hospital here with his left leg amputated at the hip. Today it was announced that he will have a new leg, the gift of Americans at Deming.

When Villa raided Columbus, Jesus was with his father's horse. He was told to hold his father's horse. The 12-year-old did so until an American bullet shattered his leg. As he dropped the Villa band turned and fled.

Jesus said today: "I thought Americans killed everybody they captured and I was afraid. I crawled away and hid in the brush. After awhile a big soldier came and got me. He was good to me. They had to cut off my leg, but it didn't hurt much. Now I want to stay here and be a real American." Deming folk will give the boy a chance.

At the end of 1915 the electrolytic copper refining capacity of the United States was reported to be at the rate of 1,827,000,000 lb. per year.

Pico Turiso, Cuba's loftiest summit, is more than a mile high.

Overland \$615

Model 75, f. o. b. Toledo.

—top Class—bottom price

This car is the result of a definite purpose to supply a definite need with definite finality.

It is built for the man whose purse cannot afford a big, expensive car—

For the man whose pride cannot afford an unsightly, little uncomfortable car—

And it is a very definite success.

Beauty is not necessarily a matter of size.

Neither does size altogether control comfort.

But skill, experience and facilities are required to build a small, beautiful, comfortable, economical car.

In a word, it requires Overland organization.

And here is the small, light car—complete to the last detail.

Its performance is on a par with its beauty, comfort and completeness.

And its price—\$615—is far below any former price for any completely

equipped automobile—regardless of appearance or comfort considerations.

A glance at the car impresses you immediately with its beauty and finish.

As you look it over and read its specifications, you realize its absolute completeness.

But you must ride in it to appreciate its comfort.

You must drive it to get the thrill its performance will give you.

You can own one of these cars. But act promptly—for no car was ever in such demand.

In spite of record productions and advancing prices, there is a shortage of cars.

The demand naturally centers on top class at bottom price—this small light car.

And no other car at anywhere near its price can compare with this one for beauty, performance, comfort, completeness and economy.

Get in touch with us today—now.
